- Coordinate with subcontractors for installation of cathodic protection system, tanks painting, insulation & Tanks calibration on time in order to meet plan dates.
- Prepare daily/weekly progress reports mentioning manpower & resource locations.
- Review Tanks, Equipments, Piping & Steel structure construction drawings and discussing with engineering for any changes and updates.
- Responsible for preparation of site manpower & equipments list and submitting to client for review.
- Plan, arrangement and follow-up of materials in coordination with site team in order to meet plan dates.
- Arrangements of Dome Roof Air raising, the maximum Roof Air raised 106 Diameter tank.
- Coordinate with client & Engineering team for all the site technical issues and solving on time.
- Involving site activities for construction of Tanks & steel structure like, Annular / Bottom plates, shell plates, roof structure, platforms, Nozzles, ladders, girders, beams, columns, bracings, walkways and hand rails and prepare relevant rigging / lifting plans.
- Co-ordination and supervision of contractors' activities to ensure that works are delivered on time and are within budget in accordance with project schedule.
- Verification of contractor invoices for payment upon verification of work performed @ site and/or in factory.
- Prepare / record material tonnage which delivered at site and issue invoicing for material as per scope.
- Attending weekly meetings with client at site for progress discussing and highlight site issues to resolve.
- Aware from **Saudi Aramco** codes & standards.
- Awareness of standards codes and Specifications about piping, steel structure & tanks.
- Reference of construction codes: API 650, API 653, ASME B 31.3 and AWS D1.1.

4) **AI – Tariq Constructors Pvt (Ltd), Karachi, Pakistan (Specialist of Oil & Gas Projects)**

Project / Site Engineer – Mechanical / April 2010 till July 2011.

Project Details:

1) **Client: Oil & Gas Development Company Limited (OGDCL) Pakistan.**

Project: Installation / Erection & Commissioning of Permeate Gas Compression Project / Package 2 Units of Gas Turbine, Compressors along with relevant accessories, piping @ Qadirpur Gas Field (OGDCL) Ghotki.

Duties & Responsibilities:

- Look after whole site for the Fabrication, Installation and Inspection of Process Piping & Erection & commissioning of two pairs of Gas Turbine & Compressor (**MAN TURBO SUPPLY**) with relevant accessories & Installation of suction scrubbers Air Discharge Coolers, Filter House accessories with Structure; Lube Oil Coolers and compressor shed structure pipe racks / supports.
- Allocation of Manpower, equipments & materials according to construction schedule and monitoring day by day activities and prepare daily / weekly reports.
- Preparation of (B.O.Q) & (B.O.M) as per drawing for supply of Equipments & relevant Materials.
- Conduct fit-up, welding, blasting, painting & erection inspection activities for piping spools, steel structure & Valves and prepare relevant inspection reports.
- Conduct foundation inspection and Vessel vertical inspection activities and get client approvals.
- Prepare rigging plan and route map for safely installation of Gas Turbine & Compressors.
- Coordination with Vender's Engineers (**Man Turbo Germany**) for the Installation, Leveling, Alignment and commissioning of two pairs of Gas Turbine, Compressor and Gear box with their accessories & prepares reports.
- Responsible for submission of procedures, method statements and test pack to client for their review & approval.

5) SEFEC Engineering Pvt. Ltd, Karachi, Pakistan (Specialist of Tank Projects)

Site Engineer – Mechanical / January 2009 till September 2009.

Project Details:

- 1) **Client: Pakistan Petroleum Limited (P.P.L) Pakistan,**
Project: Fabrication and Construction of 3 No's site built Tanks @ Kandhkot Gas Field, Pakistan.

Duties & Responsibilities:

- Generally responsible for implementations and monitoring of all mechanical related work at site as per drawings and methods / safety rules.
- Prepare project milestones and insure for implements.
- Manage manpower, resources and site activities and solve all the technical problems @ site.
- Submit site daily reports, inspection requests and all applicable monitoring reports on regular basis.
- Coordinate, follow-up with Engineering, Procurement & Fabrication team in order to complete tasks with in time and budget.
- Review Isometric and Tank construction drawings and discussing with engineering team for any changes.
- Carrying out all Mechanical works and Tank construction activities @ site.
- Attends regular meetings with client, civil engineers and consultant to provide update on project progress.
- Pre-resolve any unexpected technical difficulties and other technical problems at site that may arise any time.

6) Speed Star Engineering Pvt Ltd, Pakistan (Specialist of Oil & Gas Projects)

Construction Engineer – Mechanical / September 2007 till March 2008.

Project Details:

- 1) **Client: Oil & Gas Development Company Limited (OGDCL) Pakistan**
Project: Installation / Erection of (600MMSCFD) Expansion Project / Plant @ Qadirpur Gas field (OGDCL) Ghotki.

Duties & Responsibilities:

- Responsible for Erection, Alignment and Installation of Oil and Gas Field Vessels, Equipments like, heat exchangers, (Feed gas chiller, chiller economizer, Feed gas pre cooler) with final grouting.
- Erection and alignment of Memguard Absorber Vessels (Four), Particle Filters, Inlet Separators, and filter coalescer, degasser and slug catcher.
- Installation and assembly of Regeneration Gas Cooler, Regeneration Gas Scrubber, Regeneration Gas Heater, recycle membrane skid and valve skid.
- Good knowledge of Nozzle Orientation Drawings, Piping Layout, (P&IDs.), isometric & structure drawings.
- Responsible for Fabrication, installation and Inspection of (**Process Piping**) carbon steel, stainless steel and galvanizing and steel structural pipe supports, platforms / ladders.
- Preparing daily material receiving reports & material summary reports.
- Calculation of piping dia inches & number of joints from isometric drawings.

7) Pak Arab Engineering Pvt Ltd, Pakistan (Specialist of Oil & Gas Projects)

Assistant Engineer – Mechanical / June 2006 till July 2007.

Project Details:

- 1) **Client: PETRONAS Carigali, Pakistan.**
Project: Fabrication & Erection of Process Piping, Valves & Steel Structure @ Rehmat Gas Plant Ghotki, Pakistan.

Duties & Responsibilities:

- Look after whole the site for Fabrication, installation and Inspection of (**Process Piping**) carbon steel, stainless steel and galvanizing and steel structural pipe supports, platforms / ladders.
- Preparing daily material receiving reports & material summary reports.
- Manage site activities and highlighting / solving issues in coordination with client and top management.
- Interact with Quality team for submission of all procedures and inspection activities.
- Preparing & submitting invoices to client and timely follow-up for payments.

Training Program / Seminars / Certifications.

- ASNT Level II Certification for RT, MT & PT.
- Three days training program / course of PRIMAVERA P6 at Yanbu Saudi Arabia.

Computer Literacy:

- Efficient in MS Office (Word, Excel, Power Point) & Data entry skills.
- Record preparation, preservation and record keeping skills.
- Internet browsing, uploading and downloading skills.
- Primavera Project Planner (Initial)

Personal Details:

- Nationality: Pakistani
- Religion: Muslim
- Languages: English, Urdu & Arabic
- Marital Status: Married
- Passport No.: AL5226832
- Place & Date of Issue: 9th February 2013 (Jeddah Saudi Arabia)
- Passport Expired: 8th February 2023
- Total Experience: 11 Years in Pakistan, Saudi Arabia & UAE.
