Personal Competencies and Attributes

- Possess a strong desire for work precision and accuracy.
- Able to read & interpret technical and legal documents.
- Understand AWS, AISC, ASME, UL-142 and API standards and codes.
- Excellent knowledge of using Estimating Software systems.
- Knowledge of terminology customarily used in construction.
- Able to strategically plan, lead a team and negotiate with clients.
- Excellent organizational and time management skills.
- Adaptable for a fast-paced changing environment.
- Self-starter, proactive and able to work independently.
- Has demonstrated values in line with company's values.
- Promotes a culture of teamwork, collaboration, success and learns from other leaders.
- Understands and promotes company's mission, vision, values and Safety Standards.
- Think conceptually, analytically, systematically through mathematical and geometry skills.
- Good negotiation skills, willing to teach & learn and holds high moral and ethical values.
- Excellent communication skills through my ability to work in a diverse and multi-cultured work environment.
- Think critically and logically applying mathematical concepts to solve problem and/or troubleshoot areas of concern.
- Ability to manage multiple projects and dealing with multiple stakeholders with the ability to adhere to tight & stringent deadlines.

Communication Skills

- Excellent verbal and written communication, leadership and presentation skills.
- Team player, able to work with internal teams and clients to achieve results.
- Prepares and delivers formal presentations and project reports.

Career Summary

- I am a mechanical engineer with extensive experience in estimation, tendering and sales for various industrial projects, Chemical injection Skids, CSP & PV Solar Plants, Power Plants, PED pressure vessels & tanks and commercial projects like Airports, Metro, Stadiums, Malls and Universities.
- Predominantly working in steel industry as part of mega size construction projects across MENA/GCC.
- Have a proven track record in identification, qualification, estimation, bidding cycle management, contract negotiations while ensuring customer satisfaction.
- Technical understanding & knowledge of local /international standards and regulations due to working with high level customers and end users (e.g. ARAMCO, SABIC, SEC, SWCC,.. etc.).
- Experience in review, estimation, proposal, tendering, preparation of BOQ, material take off, standard method of measurement (SMOM), principal of measurement international (POMI), pricing, value engineering, variation orders and project risk assessment (PRA).

Professional Experience in Chemical Injection Skids

From September 2018 till the date:

- Head of Estimation and Tendering Department at Advanced Precision Services Co. (APS) @ Dammam; KSA.

About Advanced Precision Services Co. (APS):

- APS is ARAMCO approved vendor for chemical injection skids Non-Well Head Tie-ins and included in Aramco supplier information system under vendor code 10056682 and plant Number 30007736.

Chemical Injection Skids Non-Well Head Tie-ins:

- 9COM# 6000002309

Main Job Responsibilities (As Estimation & Tendering Head)

- Meet Clients, introduce our company profile and list of experience with Aramco to enhance the relationships between both parties till getting new RFQs for current projects.
- After receiving RFQs/inquiries from our valuable customers/clients, immediately I have to acknowledge the receipt of the client mails and start studying the received project documents to identify technical specifications and exact project requirements.
- Coordinate with engineering team for the technical documents, general arrangement drawings (GADs), Tanks/vessels data sheets and other design correspondences.
- Detailed study to the skids P&IDs, PFDs, ISS, Instrument Block diagrams and packages data sheets.
- Study ARAMCO standard specifications related to the skid packages (SAMSS, SAEP, SABP, SAES, etc.) to find out the accurate project requirements that can qualify our quotation for the technical acceptance.
- Send RFQs for the skid components (Pumps, Instruments, LCPs, Electrical, conduiting & wiring, piping, fittings, valves, SRVs, MCC, Structural steel and plate works, etc.).
- Send technical clarifications to clients in case of ambiguity or missing data and check the ability BCD extension if required.
- Once receiving the quotations from suppliers, I have the capabilities to negotiate prices with them based on solid technical knowledge and benchmarking procedures till getting the rock bottom prices to maintain our pricing structure in line with the optimum practical levels.
- Evaluate man-hours for various fabrication activities, assembly works, Hydrotesting, factory acceptance testing (FAT), SCADA system, site acceptance test (SAT), installation works then discuss and negotiate the final result of the skid man-hours with the operation team.
- Have good experience in providing quotations for site works (e.g. mechanical, civil, electrical, trenching, conduiting, installations and commissioning activities) based on site visits and experience of similar jobs.
- Preparation of complete project execution schedule start from getting the P.O. till the final delivery and commissioning works using Gantt Charts and others software.

-
- Prepare quotations for standalone PV Solar Systems (including batteries, inverters, power banks and supporting structure) that are required for remote sites that do not have power sources.
 - Preparation of separate studies for all types of chemical injection quills as per Aramco requirements.
 - Preparation of complete separate priced lists for all skid's spares (Start-up & commission spares, Two Years Operating Spares, Capital spares and list of special tools).
 - Study the payment terms and conditions (T&C) for each client and consider it in our pricing to avoid applying any liquidated damages (LDs).
 - Attending Job explanation (JOBEX) meetings with ARAMCO based on their preliminary bid invitations.
 - After finalizing the cost estimation sheets, I will consider the company overheads, financial charges, mark-ups to obtain the final selling prices.
 - Specify the delivery schedule for each project based on the current workload and schedule of receivable components.
 - Discuss the final selling price for each bid/tender with the company (GM) before submitting the offer case by case based on the project criticality.
 - Studying the client clarifications for both technical and commercial points and prepare responses.
 - Attending site visits based on the client requirements to evaluate the actual project requirements that shall be considered in our quotations.
 - Preparing two separate Sealed envelopes for both technical and commercial bids including all the required documents (e.g. Skids GADs, tanks data sheets, Pumps data sheets, instruments data sheet, etc.)
 - Provide help to the project team during the preparation NMR 601, 602 & 603 if required.
 - Attending kick off meetings internally and outside the company with ARAMCO and other EPCs.

Samples Projects which I have prepared the quotations for during my work with APS:-

- Please refer to attached Appendix (I), Table#1.0

Professional Experience during work with HIDADA Ltd. Co.

✎ From August 2017 till August 2018:

- Team Leader for Estimation and Proposal Dept. at HIDADA Ltd.

✎ From January 2014 till July 2017:

- Senior Estimation and Proposal Engineer at HIDADA Ltd.

www.hidada.com

✎ From October 2012 till December 2013:

- Estimation and Proposal Engineer at HIDADA Ltd.
- Location: Jeddah City, SAUDI ARABIA.

Main Job Responsibilities

- Guide and act as a mentor to the core team of estimation engineers that help in enhancing efficiency, quality and productivity.
- Identify and highlight best estimation practices to support the core team.
- Ensure smooth running of the day-to-day activities of the core team to meet productivity and output requirements.
- Allocate incoming estimation requests to the team, prioritizing actions and monitoring team resources so that customer deadlines are met.
- Work with Estimation & Proposal Manager and review inquiries / B.O.Q. / specifications and provide clarifications to estimation engineers.
- Plan project requirements by obtaining material prices, calculating man-hour cost and completing estimate and job cost sheet.
- Monitor estimation process, conduct quality checks, review and analyze cost estimates received from estimation engineers, edit work if required and ensure accuracy and viability of cost estimates.
- Lead and monitor updating information & database to improve the accuracy.
- Communicate and be the focal point for reporting data / information between the estimation manager and estimation team.
- Ensure excellent performance is acknowledged and reasons for success are shared among the team for the benefit of all.
- Monitor the core team, troubleshoot areas of poor performance and identify effective solutions to resolve issues plus doing Estimation in case of workload.

Samples Projects which I have prepared the quotations and awarded to HIDADA:-

- Please refer to attached Appendix (I), Table#2.0

Professional Experience during work with Energya Co.

✎ From October 2009 to September 2012:

- Steel Projects Cost Estimation & Proposal Engineer at Energya Steel fabrication.

www.energysteel.com

Job Responsibilities

- Study customers enquiry documents to identify specifications and requirements.
- Coordinate for the technical documents, drawings and commercial correspondence to be provided by the sales team.
- Quantify required materials from the drawings or MTOs.
- Issue enquiries to procurement department to get Prices for materials and sub-contracting.
- Maintain price structure in line with procurement team material purchase price.
- Evaluate the fabrication labor man-hours and discuss with the production manager.
- Calculate the cost of surface treatment required in accordance with the project specifications and the type of construction.
- Analyze the number and cost of various pieces of equipment for site requirement.
- Meeting clients along with sales & marketing team and understanding requirement.
- Compile a summary of the project indicating all details of the offer and any exclusions to enable sales department to prepare quotation for the customer.
- Ensure compliance to company rules & regulations and maintain confidentiality at all times.
- Ensure the estimation sheet has approval of line manager & GM (signatures) before submitting the offer, variations to be prepared & submitted to the sales team on time.

Samples Projects Estimated during working at Energya Steel Solutions Co.

- Please refer to attached Appendix (I), Table#3.0

Engineering Software & Computer Skills

- AutoCAD
- TEKLA
- Compress/PV Elite
- Solid Works
- FabTrol MRP
- CCS-Candy (Construction Estimating & Project Control)
- Excellent knowledge of Microsoft Office Package.

Education

2004-2009	Bachelor of Mechanical Engineering
Major	Mechanical Design & Production Engineering
University	Zagazig University; Egypt
Accum. Evaluation	Very Good with Honors
GPA	3.1
Rank	The 3 rd of my graduation group
Graduation Project	Welding of Dissimilar Metals (Welding Stainless Steel SS316L with Carbon Steel Materials A36)
Graduation Date	July, 2009

Language Skills

- Arabic: Native
- English: Excellent command

Personal Information

- Nationality: Egyptian
- Date of Birth: April 24th, 1986
- Marital Status: Married
