

Ahmed Moustafa Aboelela
BSc., PRMG, CLAC, PCT, A.M. ASCE, MCI Arb, CICC M, LLM, MBA (Cand.)
Curriculum Vitae

Personal Information:

- Name: Ahmed Moustafa Mohammed Abdelfattah Aboelela
- Date of birth: 17/7/1990
- Gender: Male
- Address: Building 102, 1st Neighborhood, 16th District, Sheikh Zayed, Giza, Egypt
- Nationality: Egyptian
- Military Status: Exempted
- Mobile Number: 00201003437028
- Email: eng.ahm.2011@live.com
- LinkedIn Account: <http://www.linkedin.com/in/ahmedmoustafa00>

Academic Education Brief:

- Master of Business Administration (MBA) from Arab Academy for Science, Technology & Maritime Transport (AASTMT) - Graduation Year 2023 (Expected).
- Master of Science (MSc.) in Construction Law and Arbitration from Robert Gordon University - (CI Arb and RICS Accredited) - Aberdeen Business School - Law School - Graduation Year 2018. Master dissertation was titled "A Critical Evaluation of the Society of Construction Law Delay & Disruption Protocol". It involved a critical evaluation and a comparative analysis of the Society of Construction Law Delay & Disruption Protocol, in order to find out how such protocol tackles the different delay related issues in construction projects and, eventually, if there is a need for further development in regards to such protocol.
- Bachelor of Science Degree (BSc.) in Structural Engineering & Construction Management from Zagazig University - Engineering Faculty - Civil Engineering Department - Graduation Year 2012 - with a Cumulative GPA of 3.3 (equivalent to "Very Good") with an Excellent grade in my Construction Management Graduation Project. I was ranked fifth on my class.
- Secondary Education: IGCSE (International General Certificate of Secondary Education) - Saudi Arabia.

Work History:

- From **01/02/2015** to **Present** – **Contracts Engineer Team Leader** (as of **01/01/2021**) - **Elsewedy Electric T&D**

Elsewedy Electric T&D is an international organization - subsidiary of Elsewedy Electric Group - specialized in the design, supply, install and commission of overhead transmission lines and substations. Initially my work there involved establishing a Contracts Department in the organization. I developed the department's objectives, KPI's, tasks and procedures needed in order for the department to operate efficiently and effectively. I was also involved alongside the legal and financial team in drafting the organization's standard forms (which included subcontracts, consortium agreements, pre-bid forms and work orders).

Our scope - as a department mainly - involved:

- Reviewing contractual conditions in the tender documents to ensure that the organization has a good contractual understanding of the rights/obligations and risks contained in such documents.
- Reviewing/negotiating/preparing necessary agreements that will ensure smooth efficient operation, set out clear contractual rights and obligations and forecasts implications and suggests solution mechanics to these implications.
- Administration of the organization's contracts with employers, contractors, etc. to ensure smooth effective operation.

My day to day tasks (as Contracts Engineer Team Leader) involved:

- Coordinate with management to define and implement department objectives
- Breaking down department objectives into task and delegating/assigning them to subordinates
- Reviewing subordinates' tasks and coordinating their works with other members of different departments
- Mentoring/training subordinates/interns to effectively and efficiently perform department tasks

My day to day tasks (as Senior Contracts Engineer) involved:

- Coordinate with management to analyze/implement contract strategies
- Advise on contractual matters (rights/obligations) until the closeout of the project
- Provide assistance in resolving contractual issues, claims and disputes
- Analyze the impact and liability of contractual changes
- Breaking down project/department objectives into task and delegating/assigning them to subordinates
- Reviewing subordinates' tasks and coordinating their works with other members of different departments
- Mentoring/training subordinates to effectively and efficiently perform department tasks
- Mentoring/training department interns

My day to day tasks (as Contracts Engineer) involved:

- Analyzing contractual conditions in the tender documents to understand possible risks
- Preparing briefs summarizing contractual requirements and identifying lists of rights and obligations
- Preparing/Reviewing construction related contract drafts
- Following up that invoices are being submitted and collected as per the contract requirements
- Following up the preparation of the VOs with responsible disciplines
- Preparing subcontracts (leading the negotiation till contract signature)
- Analyzing subcontractors' claims
- Preparing contractual amendments, correspondences & claims
- Ensuring proper closing out of each project/contract

- From **01/11/2013** to **31/01/2015** - **Contracts Engineer - ECG (Engineering Consultant Group) Head Office**, my job responsibilities included:

Pre-Award Consultancy Services Stage

- Reviewing contract/contractual conditions in RFPs' and ToRs' received from clients to produce contractual queries (to clarify unclear conditions/requirements in the documents), recommendations (to responsible disciplines to be taken into consideration during proposal preparation) and clarifications/conditions to be sent to the client (to clarify on what bases/conditions the proposal was based on).
- Preparing/negotiating client - consultant contracts (if no contractual conditions were included in the client's RFP or ToR) whether based on international forms of contract conditions (FIDIC) or based on ad-hoc conditions.
- Reviewing & preparing pre-bid agreements, MOUs (for different purposes), teaming agreements, sub-consultancy agreements, joint-venture/consortium agreements, etc...

Post Award Consultancy Services Stage

- Preparing employer - contractor contracts (volume one - general requirements in accordance with the CSI) to be incorporated into the tender documents, the contracts were either based on international forms of contract conditions (FIDIC) or based on ad-hoc conditions.
- Issuing tender addendums to provide clarifications or extra requirements to bidders during the tendering stage.
- Replying on bidder's contractual clarifications & conditions during the tendering stage.
- Assisting the client in pre-award negotiations and preparing letter of award for successful bidder.
- Finalizing employer - contractor contracts after incorporating the agreed deviations/additions from any tender addendums, negotiation meetings, etc.
- Issuing contract addendums for the consultancy services in case extra services were required and preparing consultant's contractual correspondences and claims.

Project Construction Stage

- Reviewing different legal documents; critical contractual correspondences, insurance documents, bank grantees, etc...
- Assessing/determining contractor's claims during project execution to determine contractor's right in regards to time/cost remedies (and the extent of remedy).
- Assessing/determining employer's claims during project execution to determine employer's right in regards to extension of defect liability period/cost reduction/LDs remedies (and the extent of remedy).
- Issuing contract addendums/VOs in case extra works were required from the contractor during project construction.

- From **01/10/2012** to **31/10/2013** - **Site Civil Engineer/Contract Administrator - ECG (Engineering Consultant Group)**: I was involved in supervising civil/structural works in Edita's New Premises project in Sheikh Zayed district - Giza - Egypt, as well as administrating the project's contract mainly during the closing stage (issuing contractual correspondences and assessing contractor's claims to determine his right in regards to time/cost remedies).

Work Achievements (ECG)

- Encouraged the Contracts Department in ECG to conduct further studies on its understanding of the FIDIC Conditions of Contract (New Red Book 1999) by arranging weekly one-hour reading sessions of the FIDIC New Red Book 1999, in these sessions each department member discussed his/her understanding of each clause (whether through practical use, academic reading/research, etc), these sessions provided the department with different viewpoints on interpreting each clause, thus improving the department's understanding of such conditions.
- Involved in the update of ECG's construction tender documents from CSI 1998 format to CSI 2005 format, this update process was focused on Volume One - General Requirements of the construction tender documents.
- Encouraged the Contracts Department in ECG to start developing provisions "solution mechanisms" for resolving delays, disruptions, and prolongation costs related issues, to be incorporated in the particular conditions of ECG contract standards.
- Encouraged the Contracts Department in ECG to conduct further studies on different delay analysis techniques so to provide more efficient delay analysis assessments fair to all projects parties.

Teaching/Training/Education Related Experience:

- Participated as a speaker in the Construction Management Conference on the 16th of November 2022 in Royal Maxim Palace Kempinski, Egypt (organized by CAD Masters). My presentation was titled: The Secret Formula for Drafting Successful Construction Contracts. The presentation illustrates the different concepts that - if adapted by the parties during the drafting of construction contracts - will ensure the success of all involved project parties. The conference was attended by a number of CEOs, directors, managers and some of the well-recognized & well-respected names in the Construction Contracts field.
- Founding member of Calibers Initiative, which is an initiative that provides aid and support for learners who wish to improve their practical knowledge base, experience and interpersonal skills in order to thrive and succeed in their personal life and professional careers. "Calibers" provides such support by offering high quality practicable learning experience that bridges the gap between the academic knowledge - gained throughout the learning paths - and professional practical knowhow that companies use in their operations.
- UTW Construction Project Management Main Coordinator/Instructor - participated in the 9th round of the University to Work (UTW) initiative (which is one of the largest engineering training initiatives in Egypt, led by ECG "Engineering Consultant Group" - one of the largest consultant engineering companies in Egypt). The UTW Round 9 initiative involved more than 500 students in 10 different disciplines (structural, architectural, electrical, ...). Me alongside my Calibers team were responsible for the Construction Project Management discipline; conducting a 120+ hours training course to the participants which involved technical lectures, soft skill sessions, assignments and a graduation project. The training course took around 3 months of preparation and was executed on an approximate period of 3 months (July - September, 2017).
- Taught Introduction to Construction Contracts & Project Risk Management as a part of a charitable initiative (Calibers) to raise money for the Syrian refugees in Egypt at Mishkah "a co-working space", where I - along with a team of instructors - have constructed a 24-hour (8 lectures) training course, all the money that was collected from such course was donated to helping Syrian refugee families in Egypt.
- Managed to plan, implement and coordinate (along with the HR department) the first ever student training program in Elsewedy Electric T&D, more than 300 applicant submitted their CVs in reply to our training announcement (in 3 weeks) which was posted on social media, more than 50 interviews were conducted to electrical and civil students from 11 different universities in Egypt. The training program was about a month long and involved:
 - Technical lectures conducted by the technical department
 - Non-technical lectures where different departments gave brief presentations of their role in the organization and in the projects, departments included; commercial, procurement, contracts, project control and quality departments
 - Soft skill sessions including CV writing, interviewing, presentation skills conducted by the HR department
- Taught Construction & Project Management at Resala Training Center (RTC) "charitable organization", where I have constructed a 30-hour (10 lectures) training course titled "Introduction to Construction Industry, Construction and Project Management" targeting civil/architectural fresh graduates and undergrads in order to introduce them to the Construction Industry, Construction Project Life Cycle and Project Management in general.
- Freelance trainer in the following topics; construction management, construction contracts, legal studies in construction, construction claims and project risk management.
- Constructed several online courses taught in the American University in Cairo with Dr. Tarek Sakr.

Teaching/Training/Education Related Courses/Certificates:

- April 2019: Gamification for Business Workshop with GamUp. A fifteen-hour workshop that aimed to provide participants with the knowledge and skills needed to implement gamification in business-related setups in order to motivate the work and development experience.
- January - March 2019: Professional Certified Trainer (PCT) from the American University of Cairo (AUC). A 60-hour training program that provides practical guidance, knowledge, and skills on how to design and deliver effective training programs. During this program, the following learning outcomes were achieved: 1) Understanding adult learning, 2) Designing/delivering training programs and 3) Assessing & evaluating training programs
- February 2019: Gamification of Learning Workshop with The Trainer. A ten-hour workshop that aimed to provide participants with the knowledge and skills needed to implement interactive learning events (game-based learning, gamification and simulation) in their training experiences in order to motivate learners to learn and provide a learning experience that is both entertaining and enlightening.

Personal Awards & Achievements:

- Founding member of the Egyptian Construction Contracts Society (under establishment) a society that groups together individuals who share the vision of improving the construction industry in Egypt through spreading, developing and enhancing the knowledge of effective and efficient contracts drafting and administration.
- ASCE University Student Chapter Practitioner Advisor - ASCE is a professional body founded in 1852 to represent, serve & advance members of the civil engineering profession worldwide. ASCE is represented in different countries and universities. Being one of the Practitioner Advisors, my responsibilities include providing advice, guidance and support to the students and smoothing their transition to their professional careers.
- Participated in the First International Startup Academy in Ganja - Azerbaijan (2016), the program was a platform, where individuals presented their innovative ideas (whether social or business ideas). The program involved training lectures, networking/group activities and a competition; where 20 teams (10 local and 10 international teams) competed against each other. The idea that we had was an initiative that aims to develop the educational system in Egypt (Calibers Initiative).
- Received an award in Syria from the Damascus vice governor for showing excellent fellowship and participation in the student exchange program between Zagazig and Damascus universities.
- Conducted several Engineering related researches at Zagazig University during my undergraduate studies (example; research titled: "The job market need for Civil Engineers in Egypt") and I was also involved in preparing many social events at Zagazig University (mainly collage trips and educational seminars).

Professional/Academic Certificates/Courses:

- Business Administration Courses - (AASMT) - 2023 (Expected)
 - Contemporary Management
 - Financial Accounting and Reporting
 - Business Economics
 - Applied Statistics
 - Human Resources Management
 - Marketing Management
 - Managerial Finance
 - Operations Management
 - Entrepreneurship & Introduction to SME's Management
 - SME's Finance
 - Starting Up a New Business – Business Plan Competition
 - Logistics and Supply Chain Management in SME's
 - Control and Accountability in Small and Medium-Sized Enterprises
 - Value-Based Marketing
 - Research Methodology & Business Reporting
 - Strategic Management
- Construction Law and Arbitration Master Courses - Robert Gordon University - 2018
 - Law of Obligations and Evidence
 - Arbitration Law
 - Arbitration Practice & Procedure
 - Construction Law
 - Advanced Construction Law
 - Construction Contracts in Context
 - International Construction Contracts

- Contractual & Legal Aspects of Construction Industry (CLAC) Courses - American University in Cairo - 2015
 - CLAC 10 - Sources and Regimes of Obligations
 - CLAC 20 - Construction Contracts / Law of Evidence
 - CLAC 25 - Comparative International Contracts (FIDC Forms)
 - CLAC 35 - Commercial Law
 - CLAC 40 - Claims & Disputes in the Construction Industry
 - CLAC 45 - Comparative Arbitration
- Project Management (PRMG) Courses - American University in Cairo - 2014
 - PRMG 10 - Project Planning and Control Techniques
 - PRMG 20 - Management of Project Resources
 - PRMG 25 - Introduction to Project Management International Standards
 - PRMG 35 - Cost Management for Engineering Projects
 - PRMG 80 - Projects Bids & Contracts
 - PRMG 95 - Risk Management
- Construction Management Undergraduate Courses - Zagazig University - 2012
 - Construction Engineering
 - Construction Economics
 - Construction Planning
 - Cost Estimating & Tendering
 - Specifications & Quantity Survey
 - Construction Contracts
 - Value Engineering
 - Quality Management
 - Construction Productivity
 - Construction Equipment
 - Financial Management

Other Professional Certificates:

- Certified International Commercial Contracts Manager (CICCM) - International Purchasing and Supply Chain Management Institute (IPSCMI) - 2021
- Professional Site Engineer Diploma - Hassan Kandel - 2014
- Technical Office Course - Marouf Courses - 2013

Professional Entity Membership:

- Chartered Institute of Arbitrators (CI Arb.) - Membership Number 35699
- Society of Construction Law (UK) - Membership Number 7974
- American Society of Civil Engineers (ASCE) - Membership Number 10283829
- Egyptian Engineering Syndicate - Membership Number 46/01942

Personal Skills:

- Easy going with very good communication, presentation & teaching skills
- Responsible, loyal, dedicated, dynamic & self-motivated with a positive friendly attitude
- Team worker, hard worker, well organized, systematic and possess very good time management skills
- Proactive, Fast learner, good listener, open minded and result oriented.

Other Skills:

- Excellent English skills (conversational and writing skills) with TOEFL iBT Scores of 97/120
- Excellent computer knowledge and experience in MS Office package

Hobbies:

- Swimming & reading, travelling & voice over

Training History:

- Trained from 7/2011 to 9/2011 in Al Zamil Steel Company in the 6th of October district - Egypt, where I trained onsite for one month on the erection of several steel structures and the remaindering period I was trained in the Zamil Steel head office in several departments including order management, planning department, engineering department and finally the fabrication factory.
- Trained from 10/7/2010 to 31/7/2010 in Syria's Governorate in Damascus which was a part of an exchange program between Zagazig and Damascus Universities, the training involved several site visits, an intensive course in the MS Project and several charity works.

- Trained from 6/2009 to 9/2009 in Inter-Cairo for Aluminum production in constructing their new Aluminum factory in the 6th of October district - Egypt, the project consisted of an administrative building and a steel structure factory, I was trained as a junior site engineer under the supervision of Eng. Mohammed Hagab (project consultant).

Why should I be selected?

I am a down-to-earth individual with goals that reach the sky and one of my life goals is to "leave a mark"; to improve, to develop, and to make people's life much easier and happier. I really love my field, I strongly believe that improving the construction field in Egypt will significantly improve the economic status of the country, thus, in a way, improving the construction field - even in a small way - will make a difference & will "leave a mark". Simply, I'm an individual who is just really eager to learn, read, work and develop to become the best at what he does, for the benefit of his field & for the sake of his country.

Thank you for your valuable time
