Mechanical Engineering& Management

Results-focused professional with 23 years' international experience in proposals, estimation, production, and management across various domains including oil & gas, construction, mechanical, and power. Adept at creating improvements to mechanical systems as well as implementing estimation standards and processes. Proven success overseeing all aspects of operations, maintenance, and repair projects to ensure top-quality outcomes. Solid history of spearheading complex and effective projects while complying with budget and time constraints.

Able to identify and provide cost savings within highly technical environments. Tri-lingual with operational command over English, Hindi, and Urdu.

Areas of Expertise

- | | | |
|-------------------------------|----------------------------|---------------------------|
| ▪ Preliminary Designs | ▪ Fabrication & Production | ▪ EPC Bidding |
| ▪ Quality Standards | ▪ Project Cost Gathering | ▪ Business Development |
| ▪ Pressure Vessels Management | ▪ Piping & Welding | ▪ Process Improvements |
| ▪ Contracts Negotiation | ▪ Commercial Awareness | ▪ Complex Troubleshooting |

Professional Experience

HIDADA LTD, Jeddah, Saudi Arabia

Oct -2019 - Present

ARABIAN BEMCO CONTRACTING COMPANY LIMITED, Riyadh, Saudi Arabia

2012 – May 2019

Senior Proposals & Estimation Engineer

Responsibilities: Plan, execute, and finalise all proposal and estimation projects according to strict deadlines. Oversee technical evaluation and release specifications of items in accordance with customer needs. Co-ordinate project and cost estimation to convert tenders into contracts. Facilitate the entire Commercial Department, negotiation process, source selection, and bidding/audit process. Create pricing strategies to increase company profit. Produce BOQ for piping, storage tanks, and pressure vessels. Define budget and analyse actual performance against estimated values. Assess RFQ and commercial elements of tenders. Prepare and review several contracts, purchase orders, invoices, documents, and correspondence. Oversee design, supply, pre-fabrication, site delivery, installation, and surface finishing of pressure vessels, piping spools, and storage tanks. Attend regular meetings with potential clients regarding submitted technical proposals.

Key Projects:

FGRS & CRS Qatif, Saudi Arabia

Client: Saudi Aramco Company Limited ☐ Technologies: ISO 9001:2015, ISO 9001:2008, Excel, ASME 31.1, API 650, AISC, ASME IX, & ASME VIII

- Led piping spools pre-fabrication as well as successfully installed and delivered steel structures to site.
- Oversaw estimation and invoicing, prepared proposals and budgets, steered strong negotiations, delivered assistance to PMT, and attended regular contract meetings.
- Co-ordinated with clients during proposal stage to address and resolve technical and commercial queries.

Simple & Combined Cycle Power Plant #10, Riyadh, Saudi Arabia

Client: Saudi Electricity Company Limited ☐ Technologies: ISO 9001:2015, ISO 9001:2008, Excel, ASME 31.1, API 650, AISC, ASME IX, & ASME VIII

- Installed equipment site, supplied pressure vessels, and co-ordinated BFWP skid frames pre-fabrication.
- Conducted power piping pre-fabrication and site installation as well as supplied large storage tanks.
